Office Action Summary

Art Unit 1724

1. Claims 9-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The specific steps of claim 9 (such as the process of using a vertical circulating well) should be positively recited. Also, the relationship of the diffuser ring to the well should be clarified.

2. Claim 5 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 5 recites organic or inorganic pollutants. It is submitted that a pollutant must be either one or the other, and that therefore, this recitation does not limit the previous claim.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(f) he did not himself invent the subject matter sought to be patented.

(g) before the applicant's invention thereof the invention was made in this country by another who had not abandoned, suppressed, or concealed it. In determining priority of invention there shall

Art Unit 1724

be considered not only the respective dates of conception and reduction to practice of the invention, but also the reasonable diligence of one who was first to conceive and last to reduce to practice, from a time prior to conception by the other.

4. Claims 1-13 are rejected under 35 U.S.C. 102(a), (f) and (g) as being anticipated by the "Cyclodextrin-Enhanced Vertical Flushing of a Trichloroethene Contaminated Aquifer" article.

The "Cyclodextrin-Enhanced..." article discloses the invention as claimed. The article has four authors in common with the inventors listed on the instant application, however, two of the inventors are not listed as authors of the article, and the article lists two authors who are not also listed as inventors.

5. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

Non-initialed alterations have been made to the oath or declaration. See 37 CFR 1.52(c) and 1.57).

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

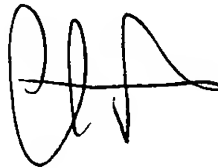

Other references of interest include Lazarowitz, Gibson, Tabor, Bernhardt, Rudder and Briggs. Patent 4,225,249 cited in the information disclosure statement appears to be a typographical error. The patent cited in the specification, 4,255,249, has been made of record.
